

Many of you will know about or have heard about the

Coronavirus. It's a virus like having a cough, cold or the

flu. It can be passed from one person to another person

by touching hands. Some adults get worried when

they see it on TV. That is because when people

get sick some people have difficulties. You will be ok,

the adults who look after you will keep you safe. The

adults at Thoresby Primary want to keep you safe too.

We want to keep you safe and healthy, and stop the

virus from spreading, so, Thoresby Primary will be closed.

For a short time you will need to do your learning at

home, with the grown-ups you live with, and any brothers

and sisters who also live with you. This means that

Thoresby children will **NOT** go to school, you will all

stay at home. Teachers will send home learning packs.

They will also send home links to online learning and

activities. The school will let your grown-up know when it

is ok to come back to school. You will be okay, you will

be safe.
